

ZYVORAI LABS · CUSTOMER DOCUMENTATION

Aurora

Admin Basics

2026-08-29

Ports

Port	Service
3000	Web UI
8000	API (/health , /docs)
8180	Optional Keycloak (source compose)
30443	Optional k3s TLS endpoint

Use `http://<host>:3000` — never hardcode lab IPs in customer docs.

Auth

- Email/password (seeded lab admin — rotate immediately; disable with `SEED_DEFAULT_ADMIN=false`)
- SSO via `SSO_ENABLED` + OIDC (BYO IdP for most deploys)
- First user is `admin` ; `editor` / `approver` / `viewer` change default landing (Danger Zone remains admin-only)

Install sketch

Trial: download release tarball → load images → `docker-compose.infra.trial.yml` then `docker-compose.trial.yml` .

Source: `make start` .

Verify: `curl -s http://127.0.0.1:8000/health`
